GENERAL INTRODUCTION 1

CHAPTER 1: INTRODUCTION 3
  1.1. CANINE AGGRESSION 5
    1.1.1. Introduction 5
    1.1.2. Aggression as a part of normal canine behaviour 5
    1.1.3. Aggression promoting factors 6
    1.1.4. Classification of aggressive behaviour 10
    1.1.5. Discussion 14
  1.2. RECEPTORS INVOLVED IN THE MECHANISMS OF AGGRESSION 17
    1.2.1. Introduction 17
    1.2.2. Androgen receptor 18
    1.2.3. Serotonin-1B receptor 22
    1.2.4. Neurokinin-1 / Substance P receptor 28
  1.3. THE BASOLATERAL NUCLEAR GROUP OF THE AMYGDALOID BODY 31
    1.3.1. Introduction 31
    1.3.2. Morphology of the canine amygdaloid body 32
    1.3.3. The amygdala and aggressive behaviour 36
  1.4. QUANTIFICATION WITHIN THE BASOLATERAL NUCLEAR GROUP OF THE AMYGDALOID BODY 43
    1.4.1. Stereology 43
    1.4.2. Differentiation of cells in the central nervous system 46
  1.5. LITERATURE 48

CHAPTER 2: MATERIALS AND METHODS 63
  2.1. ANIMALS 65
    2.1.1. Control group 65
    2.1.2. Aggressive group 66
  2.2. SAMPLING AND QUANTIFICATION 70
    2.2.1. Sampling 70
    2.2.2. Quantification 72
      2.2.2.1. Stereology 72
      2.2.2.2. Differentiation of cells in the central nervous system 77
  2.3. STAINING PROCEDURES 79
    2.3.1. Stainings for morphological analysis 79
      2.3.1.1. Nissl staining 79
      2.3.1.2. Weil staining 79
    2.3.2. Immunohistochemical Stainings 80
      2.3.2.1. Pretreatment 80
      2.3.2.2. Anti-GFAP 81
      2.3.2.3. Anti-CNPase 82
      2.3.2.4. Immunohistochemical staining using signal amplification 82
        2.3.2.4.1. Anti-AR 82
        2.3.2.4.2. Anti-serotonin-1B receptor 83
        2.3.2.4.3. Anti-substance P receptor 83
