The diagram shows the fraction of filaments (%) over time (h) of biofilm growth. It compares three different conditions:

- SC5314
- a/s1/a/s1 mutant
- a/s3/a/s3 mutant

The time points are at 0, 0.5, 1, 6, 24, 48, 72, and 96 hours. The chart includes asterisks indicating significant differences between conditions.
