RILEM, The International Union of Laboratories and Experts in Construction Materials, Systems and Structures, is a non profit-making, non-governmental technical association whose vocation is to contribute to progress in the construction sciences, techniques and industries, essentially by means of the communication it fosters between research and practice. RILEM's activity therefore aims at developing the knowledge of properties of materials and performance of structures, at defining the means for their assessment in laboratory and service conditions and at unifying measurement and testing methods used with this objective.

RILEM was founded in 1947, and has a membership of over 900 in some 70 countries. It forms an institutional framework for co-operation by experts to:

• optimise and harmonise test methods for measuring properties and performance of building and civil engineering materials and structures under laboratory and service environments,

• prepare technical recommendations for testing methods,

• prepare state-of-the-art reports to identify further research needs,

• collaborate with national or international associations in realising these objectives.

RILEM members include the leading building research and testing laboratories around the world, industrial research, manufacturing and contracting interests, as well as a significant number of individual members from industry and universities. RILEM's focus is on construction materials and their use in building and civil engineering structures, covering all phases of the building process from manufacture to use and recycling of materials.

RILEM meets these objectives through the work of its technical committees. Symposia, workshops and seminars are organised to facilitate the exchange of information and dissemination of knowledge. RILEM's primary output consists of technical recommendations. RILEM also publishes the journal Materials and Structures which provides a further avenue for reporting the work of its committees. Many other publications, in the form of reports, monographs, symposia and workshop proceedings are produced.

RILEM Publications S.A.R.L.
RILEM Publications

RILEM Publications are presented in 6 collections, corresponding to the 5 clusters of active RILEM Technical Committees, sorted by fields of expertise, and a 6th multi-thematic collection dedicated to journals and compendiums:

A. Mechanical Performance and Fracture
B. Test Methods, Materials Characterization and Processing
C. Service Life and Design
D. Durability and Deterioration Mechanisms
E. Bitumen, Masonry and Timber
F. Journals and Compendiums

Each publication is assigned to one of the following series: reports (REP), proceedings (PRO), compendiums (COMP) and journals. The former CD-ROM series is now included in one of these series.

Each publication is available in at least one of the three following editions: print (PR), CD or DVD-ROM (CD), or online (OL).

Online editions are available through our web site, at http://www.rilem.net

The RILEM DVD-ROM, gathering several thousands of online articles, is also published and updated each year (internal publication, circulation restricted to RILEM Benefactor Members).

The following list is presenting our global offer, sorted by series.

RILEM PROCEEDINGS

PRO 1: Durability of High Performance Concrete (ISBN: 2-912143-03-9); Eds. H. Sommer
PRO 2: Chloride Penetration into Concrete (ISBN: 2-912143-00-04); Eds. L.-O. Nilsson and J.-P. Ollivier
PRO 3: Evaluation and Strengthening of Existing Masonry Structures (ISBN: 2-912143-02-0); Eds. L. Binda and C. Modena
PRO 4: Concrete: From Material to Structure (ISBN: 2-912143-04-7); Eds. J.-P. Bournazel and Y. Malier
PRO 7: 1st International RILEM Symposium on Self-Compacting Concrete (ISBN: 2-912143-09-8); Eds. A. Skarendahl and O. Petersson
PRO 8: International RILEM Symposium on Timber Engineering (ISBN: 2-912143-10-1); Ed. L. Boström
PRO 13: 2nd International RILEM Symposium on Hydration and Setting (ISBN: 2-912143-16-0); Ed. A. Nonat
PRO 16: Life Prediction and Management of Concrete Structures (ISBN: 2-912143-19-5); Ed. D. Naus
PRO 17: Shrinkage of Concrete - Shrinkage 2000 (ISBN: 2-912143-20-9)
Eds. V. Baroghel-Bouyn and P.-C. Atiecin
PRO 18: Measurement and Interpretation of the On-Site Corrosion Rate (ISBN: 2-912143-21-7)
Eds. C. Andrade, C. Alonso, J. Fullea, J. Polimon and J. Rodriguez
PRO 20: 1st International RILEM Workshop on Microbial Impacts on Building Materials (2000); Ed. M. Ribas Silva (CD 02)
PRO 21: International RILEM Symposium on Connections between Steel and Concrete (ISBN: 2-912143-25-X); Ed. R. Eichgenhausen
PRO 26: International RILEM Workshop on On-Site Control and Evaluation of Masonry Structures (ISBN: 2-912143-34-9) - Soft cover; Eds. L. Binda and R. C. de Vekey

VII

RILEM REPORTS

Report 26: Towards Sustainable Roofing (Joint Committee CIB/RILEM) (CD 07); Eds. Thomas W. Hutchinson and Keith Roberts, 2001

Report 27: Condition Assessment of Roofs (Joint Committee CIB/RILEM) (CD 08), 2003

RILEM COMPRENDIUMS

COMP 01: Trilingual Dictionary for Materials and Structures (English-French-German) (CD01) (1970)

COMP 06: Concrete Science and Engineering Journal - Vol. 1, 2, 3, 4 (1999-2002) (CD05)

Introduction

As an experienced scholar, Prof. Sun Wei has been engaged in the teaching and scientific research in Southeast University China, right after her graduation from Nanjing Institute of Technology in 1958. During her 50-year teaching and research, she has brought up more than 50 masters, over 40 doctors. Professor was the dean of the Department of Materials Science and Engineering, Southeast University, the deputy editor-in-chief of Journal of the Chinese Ceramic Society. She was selected as a Chinese Academy of Engineering in 2005. At this moment, she is the director of institute of fiber reinforced concrete and the director of the Jiangsu key lab for construction materials. Together with 20 of her team members, professor Sun is still very active in research and teaching on engineering cementitious materials. With her team, she has undertaken successfully for about 40 important national or international projects and published about 350 papers. With the opportunity of the International Conference on Microstructure Related Durability of Cementitious Composites held in Nanjing this October, we would like to organize a half-day workshop for celebrating her 50th year's great contribution and achievement in teaching and research. The papers presented in the workshop will be published as a special issue.

Workshop venue

International conference hotel of Nanjing, Nanjing, China (http://www.nic-hotel.com).

Call for paper

The contributions to this workshop will deal with all aspects of concrete and reinforced concrete, fiber reinforced concrete. The length of paper is limited in 15 pages (See guider for author from http://www.microdurability.com).

Target audience

The aim of this workshop is to celebrate professor Sun the 50th year's contribution and achievement in teaching and research on civil engineering materials. All of her students, colleagues and friends are welcome to join this event.

Organization committee

Professor Miao Changwen
Dr. Ye Guang
Professor Dr. Chen Huisu
Professor Dr. Zhang Yuemei

Contents

Preface XVII

Part I Modelling of Cementitious Materials

1 Challenges and constraints of numerical modelling of cement-based systems
   Klaas van Breugel 3

2 Analytical modelling of hydration in traditional and innovative types of concrete
   Geert De Schutter 13

3 Fundamentals of modeling and experimenting technology in cement based materials
   Huisu Chen 21

4 Prediction of mechanical properties and durability of civil engineering structures
   Guang Ye, Eddy Koenders and Klaas van Breugel 33

Part II Transport and Durability Properties 49

5 Transport properties of pseudo-ductile cementitious composites
   Christopher K.Y. Leung and Chaoming Pang 51

6 Neutron radiography, a powerful method to investigate water penetration into concrete
   Folker H. Wittmann, Peng Zhang, Tiejun Zhao, Eberhard Lehmann and Peter Vontobel 61

7 The Influence of mineral admixtures on concrete anti-chloride ion permeability with stray current
   Qingjun Ding, Jian Geng and Shuguang Hu 71

8 Theory and application of cement-based materials remediation by Microbial Carbonate Precipitation (MCP) induced by microorganism
   Chunxiang Qian, Liang Cheng, Ruixing Wang and Jianyun Wang 81
Advances in Civil Engineering Materials
The 50-year Teaching and Research Anniversary of Prof. Sun Wei, 15 October 2008, Nanjing, China

9 Influence of admixtures on durability of concrete
Changwen Miao, Jiaping Liu and Jianzhong Liu

10 Investigation on chloride threshold level for corrosion of reinforcing steel in the saturated Ca(OH)$_2$ solution simulating the electrolytic environments of concrete
Jinxia Xu and Linhua Jiang

11 Katrina and climate change should we design for strength or durability?
R.N. Swamy

Part III Fiber Composites and Self-Compacting Concrete

12 Engineered cementitious composite with blast furnace slag and limestone powder
Jian Zhou, Shuzhi Qian, Mercedes G. Sierra Beltran, Guang Ye and Klaas van Breugel

13 Fracture Toughness and Microstructure of Concrete at Early-Ages
Zongjin Li, Xiangyu Jin and Chen Lin

14 Simple quality control method for determining the tensile properties of strain hardening cementitious composites (SHCCs)
Shuzhi Qian and Victor C. Li

15 Development of a new self-consolidating concrete for slip form construction
Kejin Wang, Surendra P. Shah and Thomas Voigt

16 Mix proportion design of SCC based on BP network
Qingxin Zhao, Jian Wang, Jialin Ji and Huijian Li

Part IV Early Age Properties

17 Asymptotic experimental study on static and dynamic moduli of ettringite crystal
Minghua Zhang, Jiankang Chen, Jue Zhu and Jiangying Chen

18 Influence of pore solution chemistry on shrinkage of cement paste
Pietro Lura and Barbara Lothenbach

XIV
19 Study on the shrinkage-reduction and cracking prevention of alkali-activated phosphor slag cement
Yonghao Fang, Yiqun Chen and Lili Jia

20 Optimal determination of the cover of concrete beam under multi-environmental conditions
Chunhua Lu and Weiliang Jin

21 Application of synchrotron microtomography for microstructure investigations of cementitious materials
Michael Angelo B. Promentilla, Takafumi Sugiyama, Takashi Hitomi and Nobufumi Takeda

Part V High Temperature and Thermal Expansion of Concrete Materials

22 Behaviour of special concretes in fire
Hans W. Reinhardt

23 Compressive strength and deformation of self-compacting concrete at high temperature
Jin Tao, Yong Yuan and Luc Taerwe

24 Strength deterioration of high strength concrete exposed to high temperature and its prevention and rehabilitation
Min Li, Zhishen Wu, Chunxiang Qian and Wei Sun

25 Influence of concrete components on coefficient of thermal expansion
Chunxiang Qian, Guibo Gao, Chenfeng Zhu and Shiwei Ding
