What is Open Access?

Open Access is an initiative that aims to make scientific research freely available to all. To date our community has made over 100 million downloads. It's based on principles of collaboration, unobstructed discovery, and, most importantly, scientific progression. As PhD students, we found it difficult to access the research we needed, so we decided to create a new Open Access publisher that levels the playing field for scientists across the world. How? By making research easy to access, and puts the academic needs of the researchers before the business interests of publishers.

Our authors and editors

We are a community of more than 103,000 authors and editors from 3,291 institutions spanning 160 countries, including Nobel Prize winners and some of the world's most-cited researchers. Publishing on IntechOpen allows authors to earn citations and find new collaborators, meaning more people see your work not only from your own field of study, but from other related fields too.

Bridge Optimization

Inspection and Condition Monitoring

Edited by Yun Lai Zhou

National University of Singapore

Co-editor:

Magd Abdel Wahab

Ghent University

This is a collection of several applications for condition monitoring and damage identification in bridge structures. Bridge structural condition monitoring is essential since it can provide early warning of potential defects in bridges, which may induce catastrophic accidents and result in huge economic loss. Such bridge condition monitoring relies on sensing techniques, especially advanced sensi...

Total Chapter Downloads

Open access peer-reviewed

1. Introductory Chapter: Some Insights into Bridge Structural Condition Monitoring **30**

By Yun-Lai Zhou and Linya Liu

Open access peer-reviewed

2. Computational Intelligence and Its Applications in Uncertainty-Based Design Optimization **46**

By Ali Asghar Bataleblu

Open access peer-reviewed

3. On-Site Bridge Inspection by 950 keV/3.95 MeV Portable X-Band Linac X-Ray Sources **190**

By Mitsuru Uesaka, Yuki Mitsuya, Katsuhiko Dobashi, Joichi Kusano, Eiji Yoshida, Yoshinobu Oshima and Masahiro Ishida

Open access peer-reviewed

4. Development of a Fatigue Life Assessment Model for Pairing Fatigue Damage Prognoses with Bridge Management Systems **172**

By Timothy Saad, Chung C. Fu, Gengwen Zhao and Chaoran Xu

Open access peer-reviewed

5. Fatigue Assessment of Highway Bridges under Traffic Loading Using Microscopic Traffic Simulation **300**

*By Gengwen Zhao, Chung C. Fu, Yang Lu and
Timothy Saad*

Residents of European Union countries need to add a Book Value-Added Tax of 5%. Institutions and companies, registered as VAT taxable entities in their own EU member state, will not pay VAT by providing IntechOpen with their VAT registration number. This is made possible by the EU reverse charge method.

Special discount for IntechOpen contributors

All IntechOpen contributors are offered special discounts starting at 40% OFF available through your personal dashboard
